

AJMAL SHERIF SHEIK

ANDROID DEVELOPER

+91 9629846776 | +91 7012570637 | sheikajmal@gmail.com | Thrissur, Kerala, India

PROFILE

Mobile Application Developer with 7 years of experience in Android development using Kotlin, Jetpack Compose, and Android Views, with strong expertise in Flutter and Dart for cross-platform development. Possesses foundational React.js knowledge and experience leveraging AI-assisted development workflows to deliver scalable applications and streamline development, testing, debugging, and automation in Agile environments.

TECHNICAL SKILLS

- **Programming Languages:** Kotlin, Java, Dart, React
- **Mobile Development:** Jetpack Compose, Android Views, Flutter, React Native
- **Web Development:** React.js, Material UI, Tailwind CSS
- **Architecture & Design Patterns:** Clean Architecture, MVP, MVVM, MVI
- **Dependency Injection:** Hilt / Dagger
- **Networking & Communication:** Retrofit, RESTful APIs, WebSockets
- **Additional Technologies:** Firebase, ML Kit, MicroBlink, MRZ Scanner, Payment Gateways
- **Development Practices:** Agile/Scrum, Code Reviews, Performance Optimization, Debugging, Testing, AI-Assisted Development

PROFESSIONAL EXPERIENCE

- Freelance Software Developer** | Thrissur, Kerala, India

Aug 2025 - Present

 - Designed, developed, enhanced, and maintained native and cross-platform mobile applications and responsive web interfaces using Kotlin, Flutter, React Native, and React.js.
 - Worked across multiple stages of the software development lifecycle, including requirement analysis, UI implementation, feature development, API integration, debugging, testing, and maintenance.
 - Utilized local and cloud-based AI-assisted development tools for research, coding, debugging, testing, and workflow optimization.
- Hash Include IO Technology Pvt. Ltd.** | Kochi, Kerala, India

Mar 2019 - Jul 2025

 - Developed and maintained native Android applications using Kotlin, Java, Jetpack Compose, and Android Views.
 - Implemented application architecture using MVP, MVVM, MVI, and Clean Architecture principles to improve separation of concerns, code organization, and maintainability.
 - Developed Flutter-based cross-platform applications using Dart, implementing application functionality and state management for Android and iOS.
 - Collaborated with product and development teams to understand requirements, evaluate technical feasibility, participate in code reviews, and deliver application features.
 - Contributed to responsive web application features using React.js alongside mobile development responsibilities.

KEY PROJECTS

Wundar | Social Networking

Description: A community-centric app designed to foster meaningful connections through private networks and mentorship. Enables users to create and manage communities, connect current and alumni members, support cross-community interaction, provide mentorship and career opportunities, and share community news, events, job postings, and business opportunities.

Technology: Kotlin, Android Views, MVVM, Retrofit, Hilt, WebSockets, Coroutines, Firebase, Google Maps

SunniVoice | Books & Reference

Description: A feature-rich mobile app providing Islamic articles, related audio content, and imagery. Users can explore top and trending articles, filter content by category, and deepen their understanding of Islamic culture and spirituality through an intuitive interface.

Technology: Kotlin, Jetpack Compose, MVI, Retrofit, Hilt, Coroutines, Firebase

FreshOps Team | Business & Tracker

Description: A workforce management app designed to streamline shift management and job execution. Provides employees with rosters, timesheets, site induction information, security access, task lists, and video training, centralizing resources for a more organized work experience.

Technology: Kotlin, Android Views, MVVM, Retrofit, Hilt, Coroutines, Firebase, Room Database, Google Maps

TS Digital Onboarding Solution | Security

Description: A digital user-verification solution that enables businesses to onboard users, authenticate identities with risk-based security measures, and support compliance with regulatory standards.

Technology: Flutter, Dart, Clean Architecture, MicroBlink, MRZ Scanner, ML Kit, Firebase

OTHER EXPERIENCE

G.M.J. Paper & Boards Pvt. Ltd. | Udumalaipettai, Tamil Nadu, India **2016 - 2018**

- Supervised production operations, workplace safety, quality control, water treatment, and chemical usage.
- Monitored production processes and operational parameters to maintain consistent manufacturing operations and quality standards.
- Coordinated daily production activities to support efficient workflows and adherence to operational requirements.

EDUCATION

Bachelor of Engineering | Mechanical Engineering

2011 - 2015

Sri Ramakrishna Institute of Technology | Anna University
